Docket No.: 13768.1410
U.S. Patent Application Serial No.: 10/692,432
Filed on October 23, 2003
Examiner: Thuy Chan Dao

1. (Currently Amended) A system, embodied in a computer-readable storage medium, that facilitates management of an application or service, comprising:
 - an application or service for installation on the system; and
 - an attribution component that facilitates attributing selected parts of code of the application or service with management information, the attribution component allowing a system user to specify rules in the management information that identify one or more system health criteria that are to be met for the system to be considered healthy, the system health criteria indicating a plurality of different health states including intermediate health states that indicate a partially healthy or partially unhealthy system, the management information is identified within the attributed application or service using a uniform resource identifier;
 - where the system uses the management information to manage the installed application or service.
